Karlskrona, Sweden

PROFESSIONAL SUMMARY

Experienced software engineer with **5+ years** of experience in CI/CD automation and software development. Skilled in designing and maintaining automated delivery pipelines, managing containerised workloads, and scripting infrastructure workflows. Currently based in Karlskrona, Sweden, working at **Ericsson AB**.

WORK EXPERIENCE

CI/CD Developer

Ericsson AB, Karlskrona, Sweden · June 2021 – Ongoing

- Started as a consultant via Experis AB before transitioning directly to Ericsson.
- Automate CI/CD pipelines enabling continuous integration and deployment of software applications across multiple teams.
- Write and optimise scripts in Python and Bash to automate build, test, and deployment processes.
- Manage and resolve internal customer issues through a dedicated helpdesk ticketing system.

[Spinnaker] [Kubernetes] [Docker] [Python] [Bash] [Jenkins] [Groovy] [Maven] [Git] [Microservices]

Software Engineer

Swisslog Logistics Automation, Partille, Sweden · Sep 2018 – Nov 2019

- Backend and frontend development for a warehouse management platform, primarily as a Java back-end developer.
- Developed customer-specific functionalities following Agile practices and iterative delivery cycles.
- Wrote unit, system, and integration tests to ensure software quality across releases.

[Java] [Spring] [JBoss] [MSSql] [Jenkins] [Maven] [Subversion] [WebLogic]

Summer Intern

Ericsson, Göteborg, Sweden · June 2018 – Aug 2018

- Explored testing strategies for microservice-based systems in Continuous Delivery for 5G.
- Wrote Python scripts to analyse JSON APIs and sort and process results for internal reporting.

[Python] [JSON] [Microservices] [5G] [Continuous Delivery]

PROJECTS

Swisslog Warehouse Management System

Sep 2018 – Nov 2019

Base product for automating warehouse logistics. Developed customer-specific functionalities as part of an Agile team. Focused on back-end Java development, writing business logic, unit tests, system tests, and integration tests.

[Java] [SQL] [JPQL] [JSON] [Maven] [XHTML] [Eclipse]

Aviato — Flight Notification Android App

Mar 2017 – May 2017

Android app providing real-time flight notifications for subscribed routes. Built in a 7-member team. Responsible for airline/time-interval filters, external API integration, and displaying flight data in the UI.

[Java] [Android] [Android Studio] [REST API]

SKILLS

Jobaer Ahmed

CI/CD Developer · Software Engineer

linkedin.com/in/ahmedjobaer
